

REMARKABLE TECHNOLOGIES INCORPORATED

With water being the number one crisis in the world it is Remarkable Technologies number one Priority.

RTI's scientist and engineers are working to develop new technologies that will provide clean potable water for the world. Water is need for sanitation and new technologies are needed to address sewage around the world. RTI is dedicated to be in position to provide these needed technologies providing clean water that becomes very affordable so the economic model for clean water becomes a reality worldwide.

Giving Hope to a World of Need

Water and Sanitation

Every Day Is World Water Day

Nothing is as essential to survival as water, and although nearly a billion people lack access to it, [you are helping CRS bring clean water to those in need each day](#). *Photo by David Snyder*

Facts about Water
